Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 October 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

The amendment filed on October 2, 2003 has been entered. By this amendment, claims 1-26 are now pending in the application.

Information Disclosure Statement

1. The information disclosure statement filed July 25, 2003 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 1. In claim 19, lines 4-5, the claimed "in which" is ambiguous, it is not clear what device, or what functionality the "in which" refer to.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuzuki (US 6,018,198) in view of Omote et al (US 5,735,770) (enclosed IDS) and further in view of Yamada et al (US 5,942,862) and Yamada et al (US 5,909,094).

As per claim 1-3, 9-12, 18-26, Tsuzuki teaches a vehicle driving apparatus comprising: a motor generator connected to the engine (col.10, lines 10-22); a connecting mechanism connecting the motor generator to the engine (col.10, lines 30-31); a vehicle starting means, an engine starting means, and a travel mode power generating means (col.10, lines 56-64; col.12, lines 28-63; col.14, lines 38-67; col.16, lines 35-47). Tsuzuki does not teach connecting the motor generator separately from the drive shaft; and does not teach a connecting mechanism that connects the motor to the auxiliary device, and a vibration suppressing means. However, Omote teaches connecting the motor generator 21 (fig.2) separately from the shaft 11 (fig.2) of the engine by means of the sun gear 33 (fig.2) (col.3, lines 20-35). Furthermore, Yamada '862 teaches connecting the auxiliary devices 104, 106 (fig.1) to either the engine 50 (fig.1) or the motor 30, 40 (fig.1) (abstract; col.7, lines 54-56; col.16, lines 34-54; col.17, lines 30-34); and Yamada '094 teaches a vibration suppressing means (col.18, lines 61-67; col.19, lines 1-3). It

Art Unit: 3661

would have been obvious to a person of ordinary skill in the art at the time the invention was made to connect the motor of Tsuzuki to the engine separately from the drive shaft and to incorporate the auxiliary device to the connecting mechanism of the motor, and to implement the vibration suppressing means of Yamada to the driving device of Tsuzuki in order to facilitate separate stopping control to the motor and the engine and to maintain functioning of the auxiliary devices and to prevent vibration when the engine stops supplying power to the driving shaft.

As per claim 4-8, 13-17, the claimed structured of the rotation transmitting mechanism, the torque converter, the automatic transmission would have been well known.

Response to Arguments

Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new grounds of rejection. Omote et al (US 5,735,770) (enclosed IDS) teaches connecting the motor generator 2 (fig.2) to the sun gear 33 (fig.2) which is separated from the shafts 11 and 41 (fig.2)

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3661

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any response to this final action should be mailed to:
